

HANDS-ON COURSE

# ENDOSCOPIC MINIMALLY INVASIVE BREAST SURGERY

## OVERVIEW

This one-day course provides training in endoscopic minimally invasive breast surgery (E-MIBS). Experienced surgeons will give lectures explaining the basic principles and techniques of E-MIBS. In addition, participants will have the opportunity to observe live surgeries and practice the procedure during a hands-on workshop with guidance from the faculty.

## LEARNING OBJECTIVES

This scientific program aims to equip surgeons with essential knowledge, practical skills, and insights into current clinical evidence in endoscopic breast surgery. Participants will learn to operate endoscopic systems, understand patient positioning, identify port placements, recognize key anatomical markers, and perform the technical steps of endoscopic breast procedures.
